Inventor of the Reaper A story of the invention of the eaper by Oheb Hussey, published in the Hagerstown Herald and Torchlight, has been going the rounds of the press. Hussey the patentee of the harvester, lived in Cincinnati. He had a shop in Washington county, Md., where the machines were made. The Hagerstown paper says:

"In the issue of the Herald of April 20, 1837, appears an advertisement by Hussey and a report of "The Board of the Maryland Agricultural Society of the Eastern Shore" on the machine. It recites that the board had invited Mr. Hussey to bring one of the machines to Maryland and gives an account of a public exhibition of its performance in the harvest field at Oxford, Talbot county, on July 1, 1836, and at Easton on July 12. It was subsequently taken to the farm of Tench Tilghman, where 189 acres of wheat, oats and barley were cut with it. Three mules furnished the motive power, and the gin life in a bit of a home, in an nureport says that they worked it with as much ease as if it were a drag harrow.

"The report is signed by gentlemen who were prominent in their day Sir Richard Sutton, came over to fight and generation, including Robert H. for the cup. She sailed against the Goldsborough, Samuel Stevens, Samue T. Kennard , Robert Banning, Nicholas Goldsborough, Samuel Hambleton Sr., Michael Goldsborough, Horatio N. Edmondson and Tench Tilghman."

THE MARRIAGE QUESTION.

One hears often from young menvery seldom, I rejoice to say, from young women-"Marriage is impossi ble unless one has an assured income large enough to allow a margin for which was to have been sailed on Octo- luxury." Another at- fa her's house, where she has ampl tempt was made on October 7th, which rooms, rich clothing, plenty of money was a success. It was a close race all to spend; but to invite such a girl to the way through, the following being a be one's wife, to live in a little coopedup apartment, counting every penny, slaving early and late-no, I thank you!" The young fellow set his teeth grimly, chokes down some pure and manly longings, and turns a resolute face in the direction of bachelorhood.

To be quite fair to our girls we must say that it is the exception to find them and a heavy rolling sea. The Vigilant mercenary. Very few of our daughschooner-yacht Cambria. Against the led from start to finish and again won, ters degrade womanhood by deliberalthough by a smaller margin than in ately seeking or choosing a well-to-dothe first race, the summary being as suitor. Character, congenial tastes, the sympathy, the subtle charm that attracts and wins, are potent with women; and the girls are in a small minority, who, loving a man, would not gladly and gayly share his poverty.

But they cannot say this. By the traditions and decencies of society, woman must remain sought. Modesty forbids, and her native sense of propriety invincibly restrains a girl from showing preference until it is demanded by the courtship that is her right. Many a rich man's daughter would give her white hand loyally and fearlessly to the man as poor as was her father when he begun life, provided only she were asked. Many a proud young man bars the door to his own happiness, simply because he does the girl he admires the injustice of shutting his heart against her, because he cannot provide for her a home so elegant as that of her maidenhood.

Then, too, men often set an undue value on mere accessories and ornaments, or, rather attributes to the opposite sex a disposition to overvalue these. Agirl has clever fingers and good taste. She dresses beautifully, with elegance and variety of costume Her hats, her gowns, her feathers, and flowers look as if they had cost a round sum in current coin. The man sees the lovely toilets that set off her exquisite face, her dainty figure; and, with the incompetence of a man to magine the secrets of a woman's good creature. How should he imagine the waists, how suspects the admirable contriving and careful economy, which patent to women, are concealed from men? Because, dear sir, you are pre sented to a charming and stylish girl.

A Timely Remedy.

Each season forces upon our consideration its own peculiar perils to health. The advent of fall finde many reduced in strength and viscor poolly repeat to constrength and vigor, poorly prepared to continue the business of life. The stomach and bowels, the great highway of animal economy, is especially liable to disorder in the fall. The nervous system has also suffered in the struggle. Typhoid fever and malaria in particular find in the fall that combination of earth, air and water that mark this season as especially dangerous.
The falling leaves, the decaying vegetable contribute their share of contamination Hood's Sarsaparilla furnishes a most valuable safeguard at these important points, and should be used in the fall be-

Hill, who controls and will continue to control the state machinery, does not antagonize Whitney's candidacy for the presiden tial nomination. On the contrary, he is perfectly willing that Mr. Whitney should have the solid delegation; also the Democratic nomination, although he doesn't believe he can get that, even with the earnest support of his own state delegation to start with. Why is Hill willing to see Whitney nominated? Simply because he is so well acquainted with the condition of public sentiment that he knows no Democrat can be elected President next year. Besides, he knows that Mr. Cleveland, although making a pretense of being friendly to Whitney, doesn't want him nominated. Good reasons, aren't they?"

"IN FAVOR OF A THIRD TERM."
Mr. Gray says that "Mr. Cleveland is the logical nominee next year of the Democratic party." He declares that the tariff will not be an issue, not even tariff reform we suppose, and claims "for an issue in 1896 we shall go back to basic principles. The income tax, which according to Every Evening so seriously threatened the "life, liberty and happiness" of the people, which Mr. Gray makes his platform for the next campaign, was the instrument in Demogratic hands to destroy protection. It had no regard for the wellfare of the State; overwhelming Democratic Congress its only thought was a party advantage elected with Mr. Cleveland. If Mr. Now it is abusing him or rather the Re publican Party for his acts. But the Democratic editors know how potent and that was its opinion of the only A Sussex county Democrat who has been honored by party nominations several times and by office," "a worker with the boys," said to a Middletown gentleman this week, "we have come to the conclusion that we must stop the use of money; it has really gone too far and is getting beyond control.' What an admission! The substance is: "It is all right so long as we can control it and reap the results." But the Newark "Ledger" had evidently not been informed of the conclusions of its party associates and it endorses the Jacksonian doctrine, to the victors belong the spoils, with the addition, and it matters not how you get them

The "Ledger" said: "Mr. Addicks intends to make his political power felt in this State. He s now laying his lines and drilling his Is now laying its lines and drilling its lieutenants for the coming fight. Mr. Addicks is all right and, according to political ideas, he should be Senator for Delaware to-day. It belongs to him by power of having carried the State."

The Seaford "News," however, is better posted on the new plan of attack as may be judged from the following

clipping: "So far as Mr. Addicks is concerned we feel satisfied he is very liberal with his supporters and makes himself a his supporters and makes nimself a very agreeable gentleman to them but he is doing all this for a purpose. His liberality would be all very well if he met his newly made friends on even terms, but he is not. He asks a U. S. Senatorship as the price of his agree-ableness. He is trying to market his cleverness most exhorbitantly high. And he knows he has got to use the wiles and charms necessary to pros-titute the honor and patriotism of Delawareans before he can accomplish his aims. He has no fitness for such a his aims. He has no utiless for such a trust. In such a position he would hold the delegated authority of the people of this entire State in the national council and would be expected to watch and defend their every interest but everybody knows that it is not Mr. Addicks desire to serve the people of Delaware that makes him a candidate for the Senate; he only wants to use that great authority for his own gain and his argument of his fitness is his money. It looks by this time as though both Addicks and the Republican party had had enough of each other to learn that the sooner they will both be. Addicks' election would break up the Republican party and the Republican party will be sure to break Addicks if he continues to gamble with it for a senatorship."

Whether or not it will break Mr. Addicks to continue to gamble with Delaware politics, is an open question. As the TRANSCRIPT has frequently shown the Democratic workers have educated the "floaters" to believe that on election day. They have found the way to the belief that Mr. Addicks

All America has been interested in the yachting races which began last Saturday in New York harbor for the cup which has been held in this country since 1851. A very full and accurate account of all the races sailed for the championship since that year, will be found on our first page. It is estimated that the cost in the preparation for this year's race has been at least \$300,000, and New York city is full of visitors from all parts of the world to witner yery exciting though the American yacht, Defender, was an easy winner over the English yacht, Valkyrie. The Defender in a five hours race led by 8 minutes and 16

onds at the finish. The second race in the three out of five contest was sailed on Tuusday. Unfortunately just at the start there was a collision between the two yachts, the Valkyrie fouling the Defender whose spreade Defender got off across the line, however and closely pushed her English rival throughout the course, gaining steadily to the finish when the Valkyrie was but 47 seconds in advance. The Defender en-sered a protest because of the foul and on Wednesday the committee awarded the race to the American yacht. The regret is general that there was any cause for a proest; the public had hoped for a fair and out and out victory.

The third race of the series was to have n sailed on Thursday, but the Defende went over the 15 mile course alone, in 4hr. 44 min. and 11 sec. Lord Dunraven en-tered a protest against the interference in the race because of so many excursion boats and the fleet of sight seers, and re-fused to sail. The cup has been awarded by the committee to the Defender. It is very unfortunate that the race should ter minate as it has. Every American hoped to see the cup remain in this country but the desire was for a fair contest. There is a proposition to sail over the Marblehead

rse for a cup valued at \$5000. CHESAPEAKE CITY.

A serious shooting affray occurred on Bohemia Manor on Sunday afternoon last, the parties concerned being Duncan Butcher, a notorious colored man, of Middletown and John G. Gladden, also colored of Warwick. For several weeks past the colored people have been holding camp-meeting in the grove surrounding the colored peoples church on the manor, and Sunday last being the last day, the people came from far and near.— In the afternoon, these two men wandered into a corn field, near the grove and soon became interested in a game of vap; over which an argument arose as to the ownership of a ten-cent piece, which finally ended in a quarrel and Butcher drew a revolver and fired, the balls entering Gladden's stomach. Butcher at once fied into the woods, but was finally captured by Sheriffs Harvey and Mackey and Emmet White, who had been on the grounds during the day. Dr. Karsner was at once summoned for the injured man and probed for the ball but did not succeed in finding it. Butcher was lodged in jail at Elkton and the report at this writing is that Gladden was taken to the Alms House at Cherry Hill and died there on Tuesday.

THE HOME COMING.

There are at least three class of trav-lers: those who travel and see nothing hose who travel and see but are able to tel the gift of description, the language to por tray what they have seen and heard. To the latter class belongs the Rev. F. H. Moore, pastor of Forest Presbyterian Church of this town. Mr. Moore returned last week from a two months trip abroa and filled his pulpit for the first time since his departure on Sabbath. On Sunda evening he took for his text the latter par of the 30th verse of 107 Psalm, "So he bring eth them to their desired haven." He refer red to the pleasure of a "home coming, one of the chief delights of a trip abroad," of the cordial reception he had met in every di rection, but the feature of his disc was a description of the accident in the English Channel on August 20th on his passage from the shores of France to En-gland. The "Seaford," one of the finest steamers he had ever seen, left port that morning with three hundred souls on board, expecting to make the "desired haven" in the shortest time on record, less than three hours for the 69 miles. Bu tered one of those fogs of which all have read but few have experienced and all hope of making a record was given up; soon the only thought was for safety and the speed fog horn was constantly warning off any other vessels. Soon an answering warning was heard coming out of the dense fog tha nung over the surface of the water while he blue sky was seen so bright overhead The vessels approached each other cautiously but the calculation of distances by sound is impossible, and soon there was crash, a quiver of the hugh frame of the majestic steamer, and every soul on board knew not but that a watery grave awaited the alarmed passengers of both vessels the alarmed passengers of both vessel Mr. Moore's description was very graphi and he held the close attention of every one of his large audience as he depicted so earnestly the cool and manly courage of the officers, the bravery of the crew, the

private sch death. Fortunately Mr. Moore saved all

his baggage as he "travelslight."

In closing Mr. Moore referred feelingly to the consolation of the Christian religion in the hour of his peril, and which can be experienced so fully only under similar circumstances or when the believer comes down to the great divide between time and

The lecture was most interesting and the lecture room was crowded. One incident related by him is of significance so far as related by him is of significance so far as
the policy of the government is concerned.

It will be remembered that the Transscript announced before Mr. Moore's departure abroad that he had received
through Ex-Gov. Cochran and other friends
a letter of introduction from Ambassador Bayard. This letter was of great use to Mr. Moore and it was a great pleasure to him to bring from Mr. Bayard two photographs for two of his Middletown friends, and the recipients are undoubtedly as highly appreciative of the gifts. The en-

PROF. HERMAN BOE. Our community has sustained an untol oss in the death of our brother and friend Prof. Herman Roe, which occurred Thurs day morning about one o'clock. He had evere attack of the grip in the winter which resulted in throat consumption. Hi riends earnestly hoped for his but they bow in submission to the will that power which "doeth all things well."
He lived for God and when the hour of death came he calmly peacefully testified to the truth of the promise, "I will never leave thee nor forsake thee" "Lo I am wiih yon alway, even to the end." He was in his 47th year, and leaves a wife and one son. The funeral will take place to day, a short service will be held in the church here at 12.30 and the main service will be held in the M. E. Church at Smyrn at 3 o'clock, interment at Grenwood cemtery. Prof. Roe was a local preacher the Wilmington M. E. Conference, and for several years was in the active itinerance having served the churches at Easton as Townsend acceptably, His life work was among young people, and as a teacher in private and public schools he found a wide field for his high calling. He was regarded as one of the best educators in the State and for many years was the principal of a plicant for the County Superintendency of public schools under the late Gov. Marvil. In accordance of an act passed at the last General Assembly a number of mechanica amusements will require licenses for the first time to be operated in this State. Secretary of State Whiteman has had the licenses printed and will compel the pro-prietors to take them out. The license is as follows: Merry-go-round, \$75; by and tricycle railway, \$50; haunted swing, \$20;

witch back, \$75; razzle dazzle, \$25. -A woman who was pestered as many people are, by other folks' chickens scratch ing up her flower bed and littering her yard, hit on a novel scheme for conveying a gentle hint to her neighbors. She tied a ot of small cards with strong thread to big kernels of corn, and wrote on the cards, "Please keep your chickens at home." The chickens ate the corn and carried the message to their owners in a fashion that was startling and effective.

-School opened on Monday morning with a full corps of teachers. Prof. Stamey the new principal, arrived on Friday evening of last week, having been detained som days by the illness of his wife. The first week of school is always trying, and the extreme heat of the first four school days made the work very hard. Prof. Stamey has made a very favorable impression or both his pupils and the public, and especially are his ideas of discipline favorably received. To get the best results pupils should be entered the first day and the attendance should be regular. This is a matter that parents can control. The enroll ment this week has been as follows Room 1, 16; Room 2, 23; Room 3, 50 Room 4, 43: Room 5, 31: Room 6, 26-total 189. It will be noticed that the distribution is not equal among the departments and some changes will be necessary, but time
